

INSERTS TO FIT YOUR NEEDS

**Hilti Multiline & Multipack
Tool Inserts**

A HILTI SOLUTION FOR ALL NEEDS AND BUDGETS

Multiline Inserts

Choosing the right inserts might seem like a no brainer at first but when faced with dozens of choices, do you find yourself scratching your head?

To help you easily navigate our range of tool inserts, we've classified them into three easy to recognise groups based on performance and price. Simply match your needs to one of our three distinct names and colours.

THE CHOICE IS YOURS!

●●●●●
ULTIMATE

Ultimate performance for highest productivity and most demanding applications

●●●●○
PREMIUM

Premium solution for reliable performance in everyday applications

3 DIMENSIONS OF INSERTS PRICING

Standardised pricing,
linking specification,
performance class
and pack size

Drill bits and chisels come in a variety
of sizes, diameters and lengths

Hilti inserts and consumables are classified
according to their performance level

Inserts can be purchased as singles or
in multipack quantities – the more
you buy, the more you save!

SDS PLUS
DRILL BIT

ULTIMATE DRILL BITS SDS PLUS (TE-CX)

Ultimate SDS Plus (TE-CX) hammer drill bit with full carbide x-geometry head for drilling into reinforced concrete

Best-In-Class Carbide Head

New solid carbide head has high wear-resistance and makes more precise holes for anchor setting

Unmatched Lifetime and Drilling Speed

Solid carbide head featuring gradient technology – engineered to drill easily through rebar

Unique Hilti Helix Design

Quadruple helix and optimum head geometry for consistently fast drilling speed over the entire life of the drill bit

Warranty Mark

Considered for replacement as long as the wear mark on the helix is still visible.

APPLICATIONS

Hammer drilling in reinforced concrete, concrete, masonry and other construction materials

Drilling holes for all chemical and mechanical anchor installation purposes

Technical Data

Base Material Reinforced concrete, Concrete, Masonry, Brick, Limestone

Head Shape Multi Cutter

Diameter range 5 – 28mm

PREMIUM DRILL BITS SDS PLUS (TE-C)

Premium SDS Plus (TE-C) hammer drill bit with 2-flute helix for drilling anchor holes into concrete

Geometry

Optimised tip geometry and rugged helix transition prolongs lifetime

Wide Helix Spine

Transports dust more efficiently to accelerate drilling progress

Robust 2-Cutter Head

Two cutting edges and a direct tip-to-helix transition – faster and more constant drilling speed over the bit's entire lifetime

PGM Approved

APPLICATIONS

Hammer drilling in reinforced concrete, concrete, masonry and other construction materials

Drilling holes for all chemical and mechanical anchor installation purposes

Through-holes and penetrations in concrete and masonry in the plumbing, heating and air-conditioning systems installation trades

Technical Data

Base Material Reinforced concrete, Concrete, Masonry, Brick, Limestone

Head Shape 2 Cutters

Diameter range 4 – 16mm

HILTI

**SDS MAX
DRILL BIT**

ULTIMATE DRILL BITS SDS MAX (TE-YX)

Ultimate SDS Max (TE-YX) hammer drill bit with full carbide x-geometry head for drilling into reinforced concrete

Best-In-Class Carbide Head

Solid 4-cutter and 6-cutter ($\geq 35\text{mm}$). Superior drilling performance and less jamming when hitting rebar

Unmatched Lifetime and Drilling Speed

Both in reinforced & non-reinforced concrete

Unique Hilti Helix Design

Lightweight and highly robust

Warranty Mark

Considered for replacement as long as the wear mark on the helix is still visible.

APPLICATIONS

Hammer drilling in reinforced concrete, concrete, masonry and other construction materials

Drilling holes for all chemical and mechanical anchor installation purposes

Technical Data

Base Material Reinforced concrete, Concrete, Masonry, Brick, Limestone

Head Shape Multi Cutter

Diameter range 12 – 55mm

PREMIUM DRILL BITS SDS MAX (TE-Y)

Premium SDS Max (TE-Y) hammer drill bit with carbide tip for drilling holes into concrete

Helix design

2 fluted helix allows fast dust removal and drilling speed

Robust Helix

Robust helix provides best lifetime in concrete and masonry drilling

2-Cutter with 2 Side Cutters

Smooth drilling and significantly less jamming in rebar hits compared to previous generation

APPLICATIONS

Hammer drilling in reinforced concrete, concrete, masonry and other construction materials

Drilling holes for all chemical and mechanical anchor installation purposes

Through-holes and penetrations in concrete and masonry in the plumbing, heating and air-conditioning systems installation trades

Technical Data

Base Material Reinforced concrete, Concrete, Masonry, Brick, Limestone

Head Shape 2 Cutters & 2 Side Cutters

Diameter range 12 - 35mm

CHISELS

SDS Plus
SDS Max
SH28

ULTIMATE POLYGON CHISELS TE-YPX SPX | CP

Ultimate polygon chisels with highest robustness and consistently high breaking power

Superior Robustness and Polygon Advantage

Unique polygon YPX chisel with increased bending resistance and fewer tip breakages

High Breaking Power

Fast crack initiation with minimised sticking and efficient energy transmission

Self-Sharpening

Specific polygon geometry makes the outer surface of the chisel tip wear easier to keep it consistently sharp

The Dust Cap

Keep dust out of the chuck for reduced wear and longer system lifetime

APPLICATIONS

Breaking and Demolition in reinforced concrete, concrete, masonry and other construction materials

Openings and enlargements

Chipping and surface treatment

Technical Data

Base Material Reinforced concrete, Concrete, Masonry, Brick, Limestone

Head Shape Pointed, Flatted

Diameter range 280 - 700mm

PREMIUM CHISELS TE-Y | H17

Premium chisels with reliable performance in everyday applications

Easy Re-Sharpening

Chisels made from high alloyed steel with high formability for easy re-sharpening and wear-resistance after re-sharpening

Reliable Product Quality

Consistent, high quality production output in line with defined dimensions and steel composition

Unique Inductive Hardening Process

Hardened zone on the outside makes the working part more wear-proof combined with a softer core and shank making the entire chisel more break resistant

High breaking power

Efficient energy transmission
